

2018 Rogue24 - Course Information Sheet

IMPORTANT – Competitors are advised to read this information carefully. It contains a description of the logistics of each leg of the race. There are a total of 57 check points available. **Stages must be completed in the order described below with the exception of Stages 6 and 7 which can be completed in either order.** Teams may only collect checkpoints from the stage they are on at that time; they cannot go back to collect checkpoints from previous legs, or punch checkpoints from future legs. Within each leg, teams may collect as many checkpoints in any order they wish. Each checkpoint is assigned its own score value.
